About Advance Pain Care

We are a small healthcare system with Ambulatory Surgery Centers, a physician group that includes Pain doctors, Anesthesiologists, Addictionologist, Rheumatologists, Orthopedic surgeons and Neurosurgeons. Advanced Pain Center has eight locations and one surgery center in Central Texas. They have state-of-the-art radiology and equipment, along with board-certified physicians, to help alleviate the patient's condition when neurosurgery or interventional pain management is necessary. In 2019, both locations added orthopedic services including hip, knee and shoulder procedures. Dr. Mark Malone is the principal physician.

Client Need

Advanced Pain Care lacked the internal resources to sufficiently tackle payor contracting in-house. In addition to expanding their service lines and adding new locations they needed to strengthen their payor portfolio by renegotiating current agreements and contracting with new payors.

PayrHealth's Solution

With PayrHealth, Advanced Pain care extended its contracting team and gained a strategic partner for executing a successful expansion. Prioritizing Advanced Pain Care's strategic vision, PayrHealth crafted and carried out a payor contracting strategy that set them up for strong growth.

Key Service Used

Payor Portfolio Management

3M+ new lives accessed

Expanded services and opened new locations

Client Outcome

By making PayrHealth an extension of their team, Advanced Pain Care increased reimbursement on their priority contracts and obtained new payor contracts that allowed them to expand their service offering, access to new patients, and grow revenue. They realized a double-digit percentage increase. Advanced Pain Care has partnered with PayrHealth since 2018.
