About the Client

Conclusions Treatment Center is a substance abuse rehabilitation facility located in Mission Hills, CA. Conclusions Treatment Center treats patients with a holistic mindset, focusing on addiction as a progressive disease that affects people physically, emotionally, mentally, and spiritually. Conclusions Treatment Center strives to educate patients and offer them comprehensive, compassionate care.

Client Need

Conclusions Treatment Center reached out to PayrHealth as they needed a partner to help them navigate the payor landscape and establish new contracts. They were unsure of payor contracting requirements, credentialing process, appropriate service codes, and fair market value for reimbursements. They sought the expertise of PayrHealth to better consult with their payors and get the best chance at network enrollment.

PayrHealth’s Solution

PayrHealth performed strategic research to better understand the payors requirements and pathways forward to obtain payor contracts. PayrHealth defined the different requirements for payor contracting versus facility contracting and consulted with the client on appropriate codes for the services they provide as well as fair pricing that they should expect from payors once in network.
